👤 PERSONAL DETAILS

Date of Birth : 07/05/1994

Birth

🎯 OBJECTIVE

A self-taught tech enthusiast with a passion for developing scalable web and mobile applications, high quality yet simple reusable codes, development and maintenance of legacy codes across the full stacks. I am looking to join forces with the Red Technologies to continue to grow my skill set and at the same time contribute to sustainable development of making mankind "richer", "starter" and "happier"

💼 EXPERIENCE

NFT Rolodex

Self Project

I designed a page of Picture tokens in grid format using HTML, CSS and React

<https://github.com/PatrickEinstein/myTokenRolodex>

Shopping mall project

Self Project

I designed a fullstack shopping Website using HTML, CSS , React and built backend with Firebase server side and Firestore Database

<https://github.com/PatrickEinstein/project00>

Websites

Client Projects

Designed and developed website using HTML and CSS, taught client the basics of computer languages.

Developed web forms using HTML, JQuery, Ajax that interact with PHP controller, JSON response.

Constructed blogging platform using JavaScript, HTML and CSS for retired professor to present life's work.

RESTful API

Developed API programs in the aforementioned projects

🎓 EDUCATION

HTML, CSS, JavaScript ,React ,Angular ,Mongo DB, SQL, Firebase/Firestore, PHP, Node Js, Express, C++, C# 2021 till date
W3 schools, Turing.com

Nationality :	Nigerian	Bsc Biochemistry	2017-2023 (in view)
Gender :	Male	University of Ibadan

PROJECTS

My Token Rolodex

The Rolodex web app is a simple grid layout of dynamically fetched pictures url designed using React JavaScript. It demonstrates the use of the fetch method, State, componentDidMount lifecycle and event firing in JavaScript. It demonstrates the use of components and reusability of codes.

<https://github.com/PatrickEinstein/myTokenRolodex>

Project 0

A fullstack Website with Firebase/Firestore backend. It demonstrates the reusability of components, data collection, fetch from backend, lifecycles, storage of data in app, sign in and sign up and every other features of a basic fullstack webapp.
