◈ Objective

A self-taught tech enthusiast with a passionate for developing scalable web and mobile applications, high quality yet simple reusable codes, development and maintenance of legacy codes across the full stacks. I am looking forward to securing an internship position so as to grow my skill set and to contribute to sustainable development of making mankind "richer", "starter" and "happier"

💼 Experience

Octave inc

20 February - ...

Fullstack software engineer
My Roles include the following

✓ Building RESRful APIs that stores users banking transactions in their object profile

✓ I built OTP generator and verifier to add to our 2FA authentication

✓ I collaborated in integrating paystack

✓ I designed data models for information storage into databases

✓ I set up mailing system

✓ I collaborated in the consumption of RESTful APIs front frontend and re-routing.

✓ I collaborated in the designs of userinterface
